# DIN RAIL SMART METER FOR SINGLE AND THREE PHASE ELECTRICAL SYSTEMS

*User Manual V1.3*

## Warnings

Important Safety Information is contained in the Maintenance section. Familiarize yourself with this information before attempting installation or other procedures. Symbols used in this document:

⚠️ Risk of Danger: These instructions contain important safety information. Read them before starting installation or servicing of the equipment.

⚡ Caution: Risk of Electric Shock

# 1.Introduction

This document provides operating, maintenance and installation instructions.These units measure and display the characteristics of single phase two wire (1p2w),three phase three wire(3p3w) and three phase four wire (3p4w) networks.The measuring parameters include voltage (V), frequency (Hz),current (A),power (kW/kVA/kVAr),import, export and total Energy (kWh/kVArh).The units can also measure maximum demand current and power, this is measured over preset periods of up to 60 minutes.

These units are Max.100A direct connected and do not need to connect with external current transformers (CT).Built-in pulse, RS485/Mbus outputs.Configuration is password protected.

## 1.1 Unit Characteristics

The SDM630 100A V2 series meters have 7 models:
SDM630-Pulse V2, , SDM630-MT V2, SDM630-Mbus V2, SDM630-Modbus V2, SDM630-Standard V2, SDM630-2T V2, SDM630-Mbus-2T.

| Model | Measurement | Communication | Tariff |
|---|---|---|---|
| SDM630-Pulse V2 | kWh,kVArh, kW/kVAr, kVA, P, F, PF, dmd, V, A, THD, etc. | NO | NO |
| SDM630-Standard V2 | kWh,kVArh | RS485 Modbus | NO |
| SDM630-Modbus V2 | kWh,kVArh, kW/kVAr, kVA, P, F, PF, dmd, V, A, THD, etc. | RS485 Modbus | NO |
| SDM630-Mbus V2 | kWh,kVArh, kW/kVAr, kVA, P, F, PF, dmd, V, A, THD, etc. | Mbus EN13757-3 | NO |
| SDM630-MT V2 | kWh,kVArh, kW/kVAr, kVA, P, F, PF, dmd, V, A, THD, etc. | RS485 Modbus | 4 Tariffs (RTC) |
| SDM630-2T V2 | kWh,kVArh, kW/kVAr, kVA, P, F, PF, dmd, V, A, THD, etc. | RS485 Modbus | 2 Tariffs (dual source) |
| SDM630-Mbus-2T | kWh,kVArh, kW/kVAr, kVA, P, F, PF, dmd, V, A, THD, etc. | Mbus EN13757-3 | 2 Tariffs (dual source) |

## 1.2 RS485 Serial–Modbus RTU
*Not for SDM630-Pulse V2 , SDM630Mbus V2 and SDM630Mbus-2T*

RS485 serial port with Modbus RTU protocol to provide a means of remotely monitoring and controlling the unit.Set-up screens are provided for setting up the RS485 port. Refers to section 4.2

## 1.3 Mbus
*For SDM630-Mbus V2 and SDM630Mbus-2T only*

This uses a MBus port with EN13757-3 protocol to provide a means of remotely monitoring and controlling the unit. Set-up screens are provided for setting up the MBus port. Refers to section 4.2

*If the Modbus / Mbus protocol document is required, please contact us for it.

## 1.4 Pulse Output

Two pulse outputs that pulse measured active and reactive energy.The constant of pulse output 2 for active energy is 400imp/kWh (non-unconfigurable),its width is fixed at 100ms.

The default constant of pulse output 1 is 400imp/kWh,default pulse width is 100ms. Both pulse constant and pulse width are configurable through set-up menu or communication. Refers to section 4.3

# 2.Start Up Screens

The first screen lights up all display segments and can be used as a display check.

Software version information (This information is for reference only, in kind prevail.)

The interface performs a self-test and indicates the result if the test passes.

*After a short delay, the screen will display active energy interface as follows:

Total active energy in kWh.

# 3.Measurements

The buttons operate as follows:

**U/I ◄ ESC** — Selects the Voltage and Current display screens. In Set-up Mode, this is the "Left" or "Back" button.

**M ▲** — Select the Frequency and Power factor display screens. In Set-up Mode, this is the "Up" button.

**P ▼** — Select the Power display screens. In Set-up Mode, this is the "Down" button.

**E ↵** — Select the Energy display screens. In Set-up mode, this is the "Enter" or "Right" button.

## 3.1 Voltage and Current
*Not for SDM630-Standard V2.

Each successive press of the **U/I** button selects a new parameter:

| Screen | Description |
|---|---|
| L1 L2 L3 — 000.0 V | Phase to neutral voltages. |
| L1 L2 L3 — 0.000 A | Current on each phase. |
| L1 L2 L3 — 00.00 V %THD | Phase to neutral voltage THD% |
| L1 L2 L3 — 00.00 I%THD | Current THD% for each phase |

## 3.2 Frequency and Power Factor and Demand
*Not for SDM630-Standard V2

Each successive press of the **M** button selects a new range:

| Screen | Description |
|---|---|
| M 00.00 Hz / 0.999 PF | Frequency and Power Factor (total). |
| L1 L2 L3 — 0.999 PF | Power Factor of each phase. |
| MD L1 L2 L3 — 0.000 A | Maximum Current Demand. |
| MD 0.000 kW M | Maximum Power Demand. |

## 3.3 Power
*Not for SDM630-Standard V2

Each successive press of the **P** button select a new range:

| Screen | Description |
|---|---|
| L1 L2 L3 — 0.000 kW | Instantaneous Active Power in kW. |
| L1 L2 L3 — 0.000 kVAr | Instantaneous Reactive Power in kVAr. |
| L1 L2 L3 — 0.000 kVA | Instantaneous Volt-Amps in KVA. |
| M 0.000 kW / 0.000 kVAr / 0.000 kVA | Total kW, kVAr, kVA. |

## 3.4 Energy Measurements

Each successive press of the **E** button selects a new range:

| Screen | Description |
|---|---|
| M 0000 03.14 kWh | Total active energy in kWh. |
| IMPORT 0000 03.14 kWh | Import active energy in kWh. |

---

| Screen | Description |
|---|---|
| EXPORT 0000 00.00 kWh | Export active energy in kWh. |
| T 1 0000 00.00 kWh | Tariff 1~4 active energy *For SDM630-MT V2 only. Tariff 1~2 active energy *For SDM630-2T V2 and SDM630Mbus-2T |
| M 0000 00.00 kVArh | Total reactive energy |
| IMPORT 0000 00.00 kVArh | Import reactive energy |
| EXPORT 0000 00.00 kVArh | Export reactive energy |
| T 1 0000 00.00 kVArh | Tariff 1~4 reactive energy *For SDM630-MT V2 only. Tariff 1~2 reactive energy *For SDM630-2T V2 and SDM630Mbus-2T |
| dATE 2000 01.01 | Date Year/month/day. 1st,Jan,2000 (default) *For SDM630-MT V2 only |
| T 1NNE 00:02 :16 | Time Hour/minute/second Example:00:02:16 *For SDM630-MT V2 only |

*The parameters of date and time can only be set via RS485 communication.

# 4.Set Up

To enter set-up mode, press the **E** button for 3 seconds until the password screen appears.

| Screen | Description |
|---|---|
| PASS 0000 | Setting up is password-protected. The user must enter the correct password (default '1000') before processing. |
| PASS Err | If an incorrect password is entered, the display will show: PASS Err |

To exit setting-up mode, press **U/I** repeatedly until the measurement screen is restored.

## 4.1 Set-up Entry Methods

Some menu items, such as password, require a four-digits number entry while others, such as supply system, require selection from a number of menu options.

### 4.1.1 Menu Option Selection

1. Use the **M** and **P** buttons to scroll through the different options of the set up menu.
2. Press **E** to confirm your selection
3. If an item flashes, then it can be adjusted by the **M** and **P** buttons.
4. Having selected an option from the current layer, press **E** to confirm your selection.
5. Having completed a parameter setting, press **U/I** to return to a higher menu level. and you will be able to use the **M** and **P** buttons for further menu selection.
6. On completion of all setting-up, press **U/I** repeatedly until the measurement screen is restored.

### 4.1.2 Number Entry Procedure

When setting up the unit, some screens require the entering of a number. In particular, on entry to the setting up section, a password must be entered. Digits are set individually, from left to right. The procedure is as follows:

1. The current digit to be set flashes and is set using the **M** and **P** buttons
2. Press **E** to confirm each digit setting.
3. After setting the last digit, press **U/I** to exit the number setting routine.

## 4.2 Communication

### 4.2.1 RS485/Mbus Primary Address
*Not for SDM630-Pulse V2

| Screen | Description |
|---|---|
| SEt Addr 001 | (The range is from 001 to 247 for Modbus and 001 to 250 for Mbus) |
| SEt Addr 001 | From the set-up menu,press **M** and **P** buttons to select the address ID. |

---

| Screen | Description |
|---|---|
| SEt Addr 101 | Press **E** button to enter the selection routine. The current setting will flash. |
| SEt Addr 101 | Use **M** and **P** buttons to choose Modbus or Mbus primary address |

Press **E** to confirm the setting and press **U/I** to return to the main set up menu.

### 4.2.2 Mbus Secondary Address
*For SDM630-Mbus V2 and SDM630Mbus-2T

| Screen | Description |
|---|---|
| -Id- 9999 9999 | Secondary address: 00 00 00 01 to 99 99 99 99. From the set-up menu, use **M** and **P** buttons to find the setting page. |
| -Id- 9999 9999 | Press **E** to enter the selection routine. The current setting will flash. |
| -Id- 1193 8171 | Use **M** and **P** buttons to set the secondary address |

Press **E** to confirm the setting and press **U/I** to return to the main set up menu.

### 4.2.3 Baud Rate

Baud rate range for Modbus RTU: 2.4k, 4.8k, 9.6k, 19.2k, 38.4k. For Mbus: 0.3k, 0.6k, 2.4k, 4.8k, 9.6k.

| Screen | Description |
|---|---|
| SEt bAUd 9.6 k | From the set-up menu, use **M** and **P** buttons to select the baud rate option. |
| SEt bAUd 9.6 k | Press **E** to enter the selection routine. The current setting will flash. |
| SEt bAUd 9.6 k | Use **M** and **P** buttons to choose baud rate. |

Press **E** to confirm the setting and press **U/I** to return to the main set up menu.

### 4.2.4 Parity

| Screen | Description |
|---|---|
| SEt PAri EuEN | From the set-up menu, use **M** and **P** buttons to select the parity option. |
| SEt PAri EuEN | Press **E** to enter the selection routine. The current setting will flash. |
| SEt PAri NONE | Use **M** and **P** buttons to choose parity (EVEN / ODD / NONE). |

Press **E** to confirm the setting and press **U/I** to return to the main set up menu.

### 4.2.5 Stop Bits

| Screen | Description |
|---|---|
| SEt StoP 2 | From the set-up menu, use **M** and **P** buttons to select the stop bit option. |
| SEt StoP 2 | Press **E** to enter the selection routine. The current setting will flash. |
| SEt StoP 1 | Use **M** and **P** buttons to choose stop bit (2 or 1) Note: Default is 1, and only when the parity is NONE that the stop bit can be changed to 2. |

Press **E** to confirm the setting and press **U/I** to return to the main set up menu.

### 4.3 Pulse Output

This option allows you to configure the pulse output 1.The output can be set to provide a pulse for a defined amount of energy active or reactive. Use this section to set up the pulse output for:

Toal kWh/Total kVArh
Import kWh/Export kWh
Import KVArh/Export KVArh

From the set-up menu, use ▲ and ▼ buttons to select the pulse output option.

**SEt rLY** kWh

Press ⊡ to enter the selection routine. The unit symbol will flash.

**SEt rLY** kWh

Use ▲ and ▼ buttons to choose the selection

**SEt rLY** kVArh
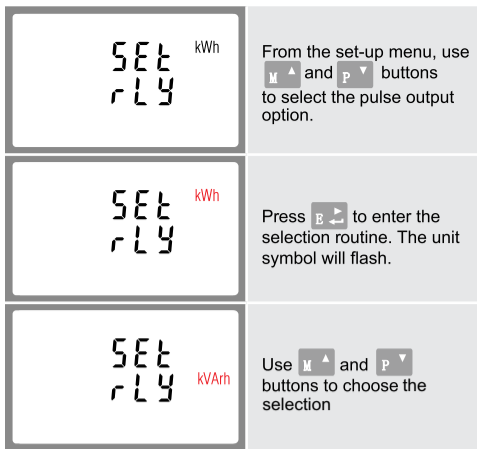

Press ⊡ to confirm the setting and press U/I to return to the main set up menu.

### 4.3.1 Pulse Rate

Use this to set the energy represented by each pulse. Rate can be set to 1 pulse per dFt/0.01/0.1/1/10/100kWh/kVArh.

**SEt rAtE 10**

(It shows 1 pulse = 10kWh/kVArh)

**SEt rAtE 10**

From the set-up menu, use ▲ and ▼ buttons to select the pulse rate option.

**SEt rAtE 10**

Press ⊡ to enter the selection routine. The current setting will flash. When it's dFt (default),it means 2.5Wh/VArh.
Use ▲ and ▼ buttons to choose pulse rate, then press ⊡ to confirm the setting and press U/I to return to the main set up menu.

### 4.3.2 Pulse Duration

The pulse width can be selected as 200,100 (default) or 60ms.

**SEt PULS 100**

(It shows pulse width of 100ms)

**SEt PULS 100**

From the set-up menu, use ▲ and ▼ buttons to select the pulse width option.

**SEt PULS 100**

Press ⊡ to enter the selection routine. The current setting will flash.

Use ▲ and ▼ buttons to choose pulse rate, then press ⊡ to confirm the setting and press U/I to return to the main set up menu.

### 4.4 DIT Demand Integration Time

**\*Not for SDM630-Standard V2**
This sets the period in minutes over which the current and power readings are integrated for maximum demand measurement. The options are: 0, 5, 8,10,15,20,30,60 minutes.

**SEt dIt 10**

From the set-up menu, use ▲ and ▼ buttons to select the DIT option. The screen will show the currently selected integration time.

**SEt dIt 10**

Press ⊡ to enter the selection routine. The current time interval will flash.

**SEt dIt 20**

Use ▲ and ▼ buttons to select the time required. Press ⊡ to confirm the selection.

Press U/I to exit the DIT selection routine and return to the menu.

### 4.5 Backlit Set-up

Backlit lasting time is settable,default lasting time is 60minutes

**SEt LP 60**

it is set as 5,the backlit will be off in 5 minutes if there is no more further operation.

**SEt LP 60**

Press ⊡ to enter the selection routine.The current time interval will flash The options are: 0(always on)/5/10/30/60/120

Press ▲ and ▼ to select the time interval.Then press ⊡ to confirm the set-up.

### 4.6 Supply System

**The unit has a default setting of 3 phase 4 wire (3P4W)**
Use this section to set the type of electrical system.

**SYS 3P3**

From the set-up menu, use ▲ and ▼ buttons to select the system option. The screen will show the currently selected system type.

**SYS 3P3**

Press ⊡ to enter the selection routine. The current selection will flash.

**SYS 3P4**

Use ▲ and ▼ buttons to select the required system option: 1P2 (W), 3P3 (W), 3P4 (W). Press ⊡ to confirm the selection.
Press U/I to exit the system selection routine and return to the menu.

### 4.7 CLR
**\*Not for SDM630-Standard V2**
The meter provides a function to reset the maximum demand value of current and power.

**CLr**

From the set-up menu, use ▲ and ▼ buttons to select the reset option.

**CLr** MD

Press ⊡ to enter the selection routine. The MD will flash.

Press ⊡ to confirm the reset and press U/I to return to the main set up menu.

### 4.8 Change Password

**SEt PASS 1000**

Use the ▲ and ▼ to choose the change password option.

**SEt PASS 1000**

Press the ⊡ to enter the change password routine. The new password screen will appear with the first digit flashing.

**SEt PASS 1000**

Use ▲ and ▼ to set the first digit and press ⊡ to confirm your selection. The next digit will flash.

**SEt PASS 1100**

Repeat the procedure for the remaining three digits. After setting the last digit, Press ⊡ to confirm the selection.

Press U/I to exit the number setting routine and return to the Set-up menu.

## 5.Specifications

### 5.1 Measured Parameters
The unit can monitor and display the following parameters of a single phase two wire (1p2w), three phase three wire (3p3w) or three phase four wire (3p4w) system.

### 5.1.1 Voltage and Current
**\*Not for SDM630-Standard V2**
• Phase to neutral voltages 176 to 276V a.c. (not for 3p3w supplies).
• Voltages between phases 304 to 480V a.c. (3p supplies only).
• Percentage total voltage harmonic distortion (THD%) for each phase to N ( not for 3p3w supplies).
• Percentage voltage THD% between phases (three phase supplies only).
• Current THD% for each phase

### 5.1.2 Power factor and Frequency and Max. Demand
**\*Not for SDM630-Standard V2**
• Frequency in Hz
• Power factor
• Instantaneous power:
• Power 0 to 99999 W
• Reactive power 0 to 99999 VAr
• Volt-amps 0 to 99999 VA
• Maximum demanded power since last Demand reset
• Maximum neutral demand current, since the last Demand reset (for three phase supplies only)

### 5.1.3 Energy Measurements
• Import active energy        0 to 999999.99 kWh
• Export reactive energy      0 to 999999.99 kVArh
• Import active energy        0 to 999999.99 kWh
• Export reactive energy      0 to 999999.99 kVArh
• Total active energy         0 to 999999.99 kWh
• Total reactive energy       0 to 999999.99 kVArh

### 5.2 Measured Inputs
Voltage inputs through 4-way fixed connector with 25mm² stranded wire capacity. single phase two wire (1p2w), three phase three wire (3p3w) or three phase four wire (3p4w) unbalanced. Line frequency measured from L1 voltage or L3 voltage.

### 5.3 Interfaces for External Monitoring

Three interfaces are provided:
• RS485 / Mbus communication channel that via protocol remotely. (not for SDM630-Pulse V2)
• Pulse output (pulse1) indicating real-time measured energy. (configurable)
• Pulse output (pulse2) 400imp/kWh (non-configurable)

The Modbus/Mbus configuration (baud rate etc) and the pulse output assignments (kW/kVArh, import/export etc) are configured through the set-up screens

### 5.4 Accuracy

| | |
|---|---|
| • Voltage | 0.5% of range maximum |
| • Current | 0.5% of nominal |
| • Frequency | 0.2% of mid-frequency |
| • Power factor | 1% of unity (0.01) |
| • Active power (W) | ±1% of range maximum |
| • Reactive power (VAr) | ±1% of range maximum |
| • Apparent power (VA) | ±1% of range maximum |
| • Active energy (Wh) | Class 1 IEC 62053-21 Class B EN50470-1/3 |
| • Reactive energy (VArh) | Class 2 IEC 62053-23 |
| • Response time to step input | 1s, typical, to >99% of final reading, at 50 Hz. |

### 5.5 Reference Conditions of Influence Quantities

Influence Quantities are variables that affect measurement errors to a minor degree. Accuracy is verified under nominal value (within the specified tolerance) of these conditions.

| | |
|---|---|
| • Ambient temperature | 23°C ± 2°C |
| • Input frequency | 50 Hz(MID) 50 or 60Hz ±2%(non-MID) |
| • Input waveform | Sinusoidal (distortion factor < 0.005) |
| • Magnetic field of external origin | Terrestrial flux |

### 5.6 Environment

| | |
|---|---|
| • Operating temperature | −25°C to +55°C* |
| • Storage temperature | −40°C to +70°C* |
| • Relative humidity | 0 to 95%, non-condensing |
| • Altitude | Up to 2000m |
| • Warm up time | 5s |
| • Vibration | 10Hz to 50Hz, IEC 60068-2-6, 2g |
| • Shock | 30g in 3 planes |

**\* Maximum operating and storage temperatures are in the context of typical daily and seasonal variation.**

### 5.7 Mechanics

| | |
|---|---|
| • DIN rail dimensions | 72 x 100 mm (WxH) per DIN 43880 |
| • Mounting | DIN rail (DIN35mm) |
| • Ingress protection | IP51 (indoor) |
| • Material | Self-extinguishing UL94 V-0 |

### 5.8 Declaration of Conformity(for the MID approved version meter only)

We Zhejiang Eastron Electronic Co.,Ltd.
Declare under our sole responsibility as the manufacturer that the poly phase multifuntion electrical meter "SDM630 100A series" correspond to the production model described in the EU-type examination certificate and to the requirements of the Directive 2014/32/EU EU type examination certificate number 0120/SGS0151. Identification number of the NB0120
