

**Integrated Ethernet Module, XL series**  
**Tootekood: HE-XEC**

**Integrated Ethernet Module for XL series**

10/100 Ethernet option kit - field installable. Kit includes all parts necessary for internal installation within the XLe, XLt or XL6 case, including a deeper plastic back cover adapted for Ethernet operation.

Program your unit and exchange data via Ethernet from remote control stations quickly and reliably with our Ethernet option card for XL series OCS.

This communications module is field installable. Kit includes all parts necessary for internal installation within the XL case, including a deeper plastic back cover adapted for Ethernet operation.

**Features**

- Connectivity with Cscape - allows remote programming, monitoring and debugging
- Data exchange - remote data monitoring and transfers via OPC or Scada applications
- Remote access - transfer files and view remotely by using Envision FX & RV software from Horner
- Download the Product Manual for more information.

**NOTE:**

Currently only models with I/O card on board (all except models 100 & 200) will support this add-on.
